Background

- As new factories expand globally, cross-language discussions are often necessary for internal meetings, handovers, and client meetings.
- The abundance of proper nouns in the company hinders from understanding discussions and key points.
- Without meeting minutes, it is easy to forget the key points and decisions that have been discussed when there are many topics.

Three major system requirements

Real-Time Speech To Text Translation

ASR, Text Translation

Company-Specific Terminology Detector

Key Word Detect, Specific Translate

Clerk Of Meetings

Search, Summarize

Task 1: Real-Time Speech To Text Translation

- Objective: The system should provide instantaneous speech to text translation between multiple languages to facilitate seamless communication.
- Evaluation:
 - Ability to handle multiple languages (Chinese, English, Japanese, German)
 - Obtain correctly translation text result
 - Real-time speech to text translation

en-US: I worked the night shift yesterday and handed over the matter to LISA.

zh-TW: 我昨天值大夜班,有把事情交接給LISA了

ja-JA:私は昨日夜勤をしていたので、その件をLISAに引き継ぎました。

de-DE: ich hatte gestern Nachtschicht und habe die Angelegenheiten an Lisa übergeben

Task 2: Company-Specific Terminology **Detector**

- Objective: Integrate GenAl capabilities to understand and appropriately translate TSMC-specific jargon and technical terms.
- **Evaluation:**
 - Detect technical terms and translate them accurately
 - Obtain correctly translation text result
 - Attached the description of professional terminology

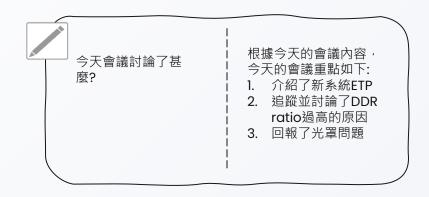

我們新的系統ETP 主要是針對跨國廠 區的會議及交接時 使用

ETP: Enterprise Translation Platform,翻譯 整合平台,提供安 務,包含會議紀錄 及杳詢等功能

Task 3: Clerk Of Meetings

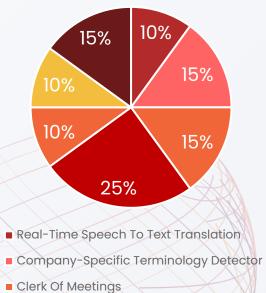

- Objective: Ability to record and transcribe meetings for future reference, system should enable users to search and summarize through the transcribed content after meeting.
- Evaluation:
 - •UI for retrieving historical transcriptions or performing transcription searches
 - Ease of use, including the clarity of the interface and search functionality

Evaluation Criteria

Item	Evaluation Description	Usage Dataset	Score
Real-Time Speech To Text Translation	 Real-time translation function, can select specify language. Output your Transcript, Chinese is the main language for scoring. 	Testing dataset	10
Company- Specific Terminology Detector	 Detect and accurately translate proper nouns based on the provided dataset, 10~15 proper nouns includes in audio file. List the proper nouns you detected. Display the explanations of proper nouns on frontend. 	Testing dataset	15
Clerk Of Meetings	 Store and organize meeting minutes, display with user input language. The presentation results need to include the following items: meeting summary, assigned tasks. 	Training dataset Testing dataset	15
System Architecture	Including completion, design flow, UI or full system.	-	25
Creativity	 In addition to data processing and analysis, what other usage or scenario can be used? 	-	10
Presentation	The solution should be presented in a clear and concise manner, with appropriate documentation.	-	10
Live Demo	 Live demo your solution with demo audio, the audio file lasts about 1 minute. Output your Transcript, Chinese is the main language for scoring. 	Demo dataset	15

System Architecture

Creativity Presentation

■ Live Demo

Dataset Description

Training.zip:

- •Training.wav: Recording during the meeting, including Chinese, English, Japanese and German.
- •Knowledge Dataset.xlsx: Special terminology data set, including Chinese, English, Japanese and German.

Testing.zip:

•Testing.wav: Recording during the meeting, including Chinese, English, Japanese and German.

Knowledge Dataset.xlsx

Contains proper nouns and corresponding translations in four languages

Type Proper Noun Description

Stocker儲存標。

Sheet: cmn-Hant-TW, en-US, ja-JP, de-DE

Contains Transcript and Chinese translation of Training.wav, Red is type fab,
Blue is type IT and GCP

Sheet: Training wav

Defective Dies Ratio, Awafer defect的一個指揮,為一個基準定義此批產品是否會利服,而這些defect影響產品yield的程度。 是機合的設定值,有些能够改,因製程調機參數不同可作變動,根據製程定義,有些無法解改,像是無合的温度都感激定的。機会交回去之前一定要檢查EC是Ematch母质

Active Load Port ,當機台的兩個Port被Lot塞高後,第三批貨先行傳至機台旁的ALP,當機台Port上的貨跑完被取走後,ALP上的貨物會藉由ALP的手對傳至機台上

Cloud Ins. — 概形之於哲學不合,讓既後者可以認行認識化於應用形式。它女持由數模。相說於量或此數據訓練演》。命台語與 HTP 製動的使服務 Cloud Function 是一種無何措施的計畫服務。允许開發者模寫態原的第一用途功能,並推議事件無效自動於了,無效音程但開發基礎稅施。 DugCuery 是一個新印度整的,為父親便的重數主演服務。提供稅格。以。資格於了,進分分析火規模維持,文持即等分析 Punktub 是一種均衡集務的,為父親便的重數主演服務。提供稅格。以、資格於了,進分所不均衡維持,文持即等的 Punktub 是一種均衡集務的,允许每川程於之間無行可靠且可關稅的時间的勞結。文持等不關節機能可能交換推進。 Codd SQL 是一個完全性發明整次其時期節,支持時的不可。Punktub Kener 可以經歷數故歷,推議的管理資料课。

機台上用來定義為基準點的標記,通常為從Wafer上選定一個特定(非對稱、無重複性)的位置,好讓機器能夠自動抓取作為基準點

Equipment Constant System. 防止因機台參數被更改而造成產品報廢之風險,相當於設備工程師的RMS

Enterprise Translation Platform ,翻譯整合平台,提供安全日即時的翻譯服務,句含會議紀錄及查詢等功能

Engineering Change Certification Plan (工程變更驗證計劃)。

Data Platform,資料收集平台,收集各種系統log並分析異常 Secure GenAl Platform,安全GenAl平台,提供安全的AI服務。

Notice

- Remember turning off GCP environment once you don't perform anything.
- Download dataset from "careerhack2025-icsd-resource-bucket" GCP bucket with gsutil command.
 - •gsutil cp gs://careerhack2025-icsd-resource-bucket/Training.zip gs://{your bucket name}/

Resource:

- Cloud Storage & Artifact Registry: Each team has 200 GB to store your data.
- Compute Engine, Cloud Run, Cloud SQL, GKE: Each team has 60 hours to use.
- •5 points will be deducted if GPU(GKE) exceeds one hour
- Teamwork is important, which is also important in the workplace.
- Please send your question to <u>careerhack@tsmc.com</u> with title [企業溝通無國界翻譯系統] C* after meeting.

Submit Results

Transcript & Proper Nouns

- Submit the transcript & proper nouns list you identified based on the testing wav, upload to your own bucket before 2/15 13:00
- List all detected proper nouns. If there are duplicates, don't list only one.
- Naming by [Cnumber_transcript] and [Cnumber_proper_nouns].

```
•C1_ transcript.txt
```

•C2_ proper_nouns.txt

```
大家好,今天要討論的是關於DDR Ratio的問題,在dp上發現這週的ratio很高,請問MARTIN是否知道發生原因:
很抱歉我昨天值大夜班,有把事情交接給LISA了,可以請他說明原因
關於這周DDR ratio過高的原因可能是EC被動過的原因,我回去和母版比對後發現溫度等數值都不太一樣
為什麼EC會被更改過,數值不是應該和母版對齊嗎? IT能不能查一下系統的log,確認做change的人是誰?
另外,IT能否也將做change的資料上架到dp,當有人做了不符合權限的事情可以印出資料,並自動寄送alert信件給相關人員。
好的,這件事技術上沒問題,但我需要回去和我老闆討論一下,因為這屬於架構上的change,我這邊需要新增cloud function來抓log的資料,BigOuery那邊也需要新增table欄位才行。
     你下次再update這件事給我。另外EC被動過這件事也請Martin追一下發生原因,也請你下次update給我,謝謝
好了今天的會議就開到這邊,謝謝大家

Submit Results

Demo ppt & Presentation

- Upload your demo ppt to your own bucket before 2/15 13:45.
- Demo ppt naming by [Cnumber_vnumber].
 - •C1_v1.pptx
 - •C2_v3.pptx
- Presentation Timeline Description:
 - Presentation: 15 mins (include live demo)
 - •QA: 5 mins
 - •Live demo: 1 min

Timeline

2/7 Workshop

2/15 Hack Day 2

- 1. Workshop
- 2. Provide cloud resources
- 3. Provide training dataset

- 1. Hack Day 1
- 2. Provide testing dataset
- . Hack Day 2
- Submit the transcript and the proper nouns you identified based on the testing way, upload to your own bucket before 13:00
- 3. Present your project
- 4. Upload your ppt before 13:45
